Alois Tatenda Muzeya

DATA ANALYST/BI DEVELOPER/ DATA SCIENTIST/PYTHON AND R DEVELOPER/AWS DATA ENGINEER

Midrand, GP | +27 71 501 8980. +27 76 860 3007 | tatendamuzeya@yahoo.com

🌐 tatendamuzeya8.wixsite.com/aloisresume

Summary

I am a great software engineer,have great coding skills, creating web based applications and business transformation in programming and web development, i have great understanding of Businesses intelligence data warehouse ETL, I develop insightful business intelligence reports (Compass Reporting and systems, metrics, adhoc queries pentaho tools Qlickview), dashboards, and/or adhoc analyses. Clean and transform data as required to deliver actionable informationi collaborate with other BI developers in team, end users, analysts, and management to ensure the creation and delivery of business intelligence solutions. Lead a major effort to model inter-database interfaces using metadata; document extract-transform-load (ETL) stored procedures; organize and coordinate tasks of DBAs, developers, and other analysts. Use MetaCenter, SQL-Server, MS-Excel, and ERWin as primary tools. Brought order-of-magnitude improvements in IT modeling of business process; attained 50% reduction of unplanned "patches.

Use of reports and analyses to identify potentially problematic data, make corrections, and eliminate root cause for a range of complex data problems, and recommend possible solutions and communicate to organizational impact
i can fit-gap analysis comparing existing reporting solutions with BI strategy and assess compliance with best practices and established standards.
Participate in user acceptance testing of new BI analysis and reporting systems, upgrades, enhancements and change requests; plan, conduct and document results of testing. Have great expirience with Agile methodology, SAFE, Lean and scrum lead developer.
Assist in supporting the MS SQL Server/ Azure Database Administrator
Complete documentation on BI Dashboards and data flow processes. I am a very energetic young man eager to learn. with great experience in the IT industry IT Support, Web based administration, Programming and Development front end and back-end developing
mobile applications android and iOS with apache Cordova in visual studio. I further expanded my knowledge with SAP HANA Technical Architect that covers from Hana installation,sizing,configuration, ana securities,Hana studio, smart data and BI, and Oracle Database (PL/SQL) administration oracle reporting, dashboard and analytics with OBIEE, also took studies Developing number of Code languages,JAVA SOFTWARE Engineering can partner with developers, analysts, QA and support engineers throughout the product lifecycle to produce high-quality, user-friendly, scalable and bug-free software

Work experience

SENIOR OBIEE DEVELOPER/te   20/08/2018 - PRESENT
LIBERTY LIFE INSURANCE

Oracle data analytics and Data visualization

ETL with Oracle Data Integrator

ODI configurations

DATA preparation management and maintaining data processes on ODI

I did trickle-feed integration process to SOA enables services

Oracle cloud Infrastructure DS

Oracle PL/SQL Development

Skills

DATA SCIENTIST/ MACHINE LEARNING & AI ()

I am passionate data analyst with great reporting capabilities and data modelling and visualizations in different data analysis tools

Development of machine learning models for various areas of the business on the Big Data Platform
Development of prototype code in PySpark for automated training and scoring of the machine learning models
Machine Learning Model performance tracking and reporting using e.g. Qlik
i use data visualisation for engaging audience in a compelling way, enabling effective storytelling

Python or R programming experience

Reproducible coding (Coding standards, Git)

Big data, data wrangling and visualisation experience

Deployment of machine learning models

Experimental design,Worked with senior data scientist to deliver key packages of work to meet the needs of business customers
Big Data Engineering for data ingestion to support use cases
Works in partnership with Big Data Production Data Engineering for model automation and productionising

R programming using RStudio 80%

ETL

Oracle Analytics Cloud and visualizations, augmented analysis, and natural language processing through an easy-to-use interface.

AI and machine learning, Oracle Analytics Cloud for any level of user to generate deep insights and create forward-thinking reports.

IOT Models : Tensorflow

Data Science used models: Decision tree Classifiers, KNN, Regression models, Linear

Oracle Business Intelligence Development

BIP REPORTING

RTF Template design and development

Data management

Warehousing

Python Development and data mining

Performance tuning & production deployment.

Agile Methodology training and version control

Oracle PL/SQL modules, triggers, functions, procedures, queries, and UNIX scripting

Compass System Development and reporting

Oracle Forms and Reports with TOAD / SQL Developer for Investments and Retirement Funds

Oracle Data Visualisations

Oracle DV desktop application Configuration and BIP

Oracle and compass analytics and query function analysis

SENIOUR ORACLE PL/SQL DEVELOPER 02 Oct 2017 - 16/Aug/2018
Ignition Group-MVNX Mobile

Coordinated for the Logical review team to processed all database structure changes. Disseminated information to the users on naming standards, data governance, normalization rules within CBP.

- SQL conversion to azure
- Data load migration with AZURE DATABASE MIGRATION SERVICE
- Workload management
- deploying local database to Azure
- Developed, and maintain Logical and Physical Models for Databases in MVS, DB2, ORACLE, and SQL Server using Erwin Data Modeler.
- Data migration From Oracle to Azure and microsoft power BI
- Microsoft sql server reporting and postman
- Performed forward and reverse engineering processes to create DDL scripts or physical Data Models. Created ERWIN reports in HTML, RTF.
- Provided technical assistance and guidance to the program office as the physical data architect for analysis of data requirements to third form normalisation.
- Maintained the contents of the CBP Data Dictionary and provided DBA support including backups, downloads, recoveries, upgrades to SQL server.
- Acted as ERWin administrator, installed ERWin client software on user's desktop, provided technical support, testing and training.
- Developed SQL scripts to produce reports within ERWin's Data Browser to enhance validation and identification of entities and tables components across Model Mart.
- Developed "Procedures" and "Process" documentation as needed.
- Reviewed and mapped data components to NIEM domains as input to creating IEPD's.
- Digital cockpits were developed for following areas: [company name] CEO Cockpit (includes revenue, expense, head count, etc.), Six Sigma, GE Women's Network, and GE Public Relations.
- Requirement analysis.
- Design & development (PL/SQL programming) and Informatica mappings.
- Reports development.

BI & Analytics, Developer (7 YEARS)

▰▰▰▰▰▰▰▰▱▱

Great understanding of Businesses intelligence data warehouse ETL,with ODI, connect the Oracle Data integrator Loading and extraction preparing data before ETL process have experience with the graphical interface and data integration, I develop insightful business intelligence reports ,i.e Oracle BI Publisher Reports and analytics dashboards, and/or adhoc analyses.
Clean and transform data as required to deliver actionable information
i collaborate with other BI developers in team, end users, analysts, and management to ensure the creation and delivery of business intelligence solutions
Use of reports and analyses to identify potentially problematic data, make corrections, and eliminate root cause for a range of complex data problems, and recommend possible solutions and communicate to organisational impact
i can fit-gap analysis comparing existing reporting solutions with BI strategy and assess compliance with best practices and established standards.
Participate in user acceptance testing of new BI analysis and reporting systems, upgrades, enhancements and change requests; plan, conduct and document results of testing.

- Performance tuning & production deployment.
- Tools Used: Oracle, PL/SQL, Informatica, Business Objects.
- Design of Teradata data Warehouse tables as per the reporting requirements.
- Modeling the tables as per the Corporate standards using Erwin, generation of DDL and coordination with DBA in the creation of tables.
- Preparation of Report Mapping documents, Source to Target Mapping documents (STM) and for loading the data to Target tables.
- Developed ETL load SQL queries using Complex Joins which involves tables spanning the entire data model for the Teradata Data Warehouse.
- Developed SQL stored procedures as per the business requirements of the ETL load processes.

Design, build and maintain ETL pipelines to support data and analytical needs.
Design and develop data warehouse platform, capabilities, data schemas, and models
Build integrations with third-parties to link their data to our systems based on standardised formats
Manage multiple concurrent database and software development projects using a Software Development life cycle,

Java development
Troubleshoot data issues, validate result sets, recommend and implement process improvements
SQL tuning

AZURE DATABASE MIGRATION SERVICE

AZURE STUDIO

ORACLE BIP

Pentaho Data Integration

QLICKVIEW Reporting

Power BI

AZURE SQL SERVER MANAGEMENT

Telecoms experience Activations report, Usage Reports, Qnt Reports,Base reports etc

Helped developing PL/SQL packages, Conducted Unit testing, coordinated the production deployment and resolved Post implementation issues. Provided Maintenance & Support of the existing applications

SAP SENIOR BI CONSULTANT
2016-05 - 2017-06

Mbulase Group

Worked on Disclosure Management applications providing report-writer functionality through word processing and spreadsheet applications commonly used in manual reporting steps.

installed and did support on the disclosure management application at WesBank kenya

integrated with other SAP EPMS

- Gathering and updating project materials, completing budgeting, forecasting, project documentation, business flows, and lessons learned documents
- Scheduling and allocating work, providing advice and guidance, and resolving problems to meet technical performance and financial objectives
- Coordinate all Scrum Ceremonies including Sprint Planning, Daily Standups, Sprint retrospectives, Sprint Demos, Story Grooming, and Release Planning
- Coaching and mentoring other ScrumMasters on our program team. Partnering to ensure that our ways of working are consistent across teams
- Assist in defining and deploying new product development processes and in facilitating the continuous improvement of existing processes
- Coaching and mentoring other Scrum Masters on our program team. Partnering to ensure that our ways of working are consistent across teams
- Liaising between developers and project stakeholders; fostering quality communication

Assist in supporting the MS SQL Server/ Azure Database Administrator

ATTUNITY

DATA MIGRATION & DATA MODELLING (5 years)

- T-sql writting
- managing team of analysts, developers, testers or engineers and drive delivery of a small module within a project (Delivery/Maintenence/Testing) You may serve as entry level specialist with expertise in particular technology/industry domain/a process / application / product. You are responsible for functional/technical track of a

between engineering disciplines
- Successfully coached development teams in adopting the Agile software development to remove time to market and reduced defect by 30%

DATA MODELLING EXP

- Built the physical data model for customer review and approval and constructed the registration database using Oracle 11g on a windows platform.
- Provided scripts for load strategies, backup and recovery procedures and performance tuning to ensure the system was available 24/7.
- Produce the data dictionary and database support documentation to the customer so the system could be turned over to them for future support.
- Lead and mentored the development staff on efficient coding design techniques and performed regular diagnostic checks on the production system to ensure peak performance.

SAP HANA STUDIO

Obiee

Oracle pl/sql

sql database

- Executed data modeling using ERwin data modeling tool.
- Created the data models for OLTP and analytical systems.
- Engaged in data profiling to integrate data from different sources.
- Performed the gap analysis and impact analysis.
- Assisted DBAs on support needs and provided guidance on architectural issues.
- Worked with Development teams with loading and extracting data (ETL).
- Facilitated QA for developing test plans and test cases for unit, system and Enterprise testing.
- Collaborated on the data mapping document from source-to-target and the data quality assessments for the source data

DATA MIGRATION AND QA TESTER   2015-02 - 2016-03
Mata Technologies

Designed and implemented a worldwide distributed database to assist the order processing, sales commissions, and customer support functions.

- SQL conversion to azure database
- AZURE Database migration service
- Data workload management
- Developed data modeling project plans
- Modeled data requirements for multilingual database project so support multiple countries
- Integrated multiple logical data models into a single data model
- Designed database for support worldwide application
- Implemented data-centric project methodology
- Coached and supervised other intern data modelers

project.

- ○ Executed data modeling using ERwin data modeling tool.
  ○ Created the data models for OLTP and analytical systems.
  ○ Engaged in data profiling to integrate data from different sources.
  ○ Performed the gap analysis and impact analysis.
  ○ Assisted DBAs on support needs and provided guidance on architectural issues.
  ○ Worked with Development teams with loading and extracting data (ETL).
  ○ Facilitated QA for developing test plans and test cases for unit, system and Enterprise testing.
  ○ Collaborated on the data mapping document from source-to-target and the data quality assessments for the source data
- Experience with Informatica
- Experience with Maximo or other Enterprise Asset Management spatial apps
- Experience with any Work & Asset Management System
- Experience/knowledge of XML/XSLT
- Experience/knowledge of Java/J2EE/JAVA Script
- Experience/knowledge of ArcGIS
- Experience/knowledge of JSON REST API
- Ability to create clear, concise, and detailed test scripts from high-level test plans
- Excellent verbal and written communication skills
- Excellent interpersonal skills and ability to work with others
- Ability to work independently and self-motivate
- Ability to handle and prioritize multiple tasks in a fast-paced team environment
- Ability to learn new technologies and processes quickly with excellent attention to detail
- Strong understanding of SDLC
- Provide input and shape SIT & UAT processes in line with industry best practices.
- Oracle pl/sql
- sql database
- Modeled new data models based on user requirements and updating existing data model. Created new metadata and updating existing metadata.
- Discussed with business clients on

Performance Tuning.
T SQL Server 2008 onwards.
T-SQL SQL scripting & debugging (stored procedures, user functions etc.).
Did high level SSIS development.
Telecoms experience
worked on some cloud technologies like amazon and azure temporarily

Web Developer
2014-08 - 2015-01

Yonder Media

POSITION: Front Web Developer

QA Tester at Yonder

Java Web development

Created & maintained a centralized repository of UI components, participated in usability testing & research.

Responsible for investigating the issues, defects, determining problem root cause, formulating corrective action recommendations & implementing them. Created web services and producing WSDL to the Client side.

USSD applications testing and reporting

PHP and SQL login pages

HTML5 JAVASCRIPT CSS3 web applications and website development using JOOMLA

Intern IT Support Manager, Webmaster
2013-08 - 2014-07

Supreme Motors

Intern IT support Manager, Webmaster

Website monitoring

Spray painting mixer machine software updates and maintenance

Quotation system coded in PHP

Website was done in pure HTML JavaScript and css3

all round IT support

maintenance

leader in newly adapted technologies

management meetings for representing IT department

Junior JAVA SOFTWARE ENGINEER
2012-01 - 2013-07

Office Kings

POSITION: Systems Analyst/duties

- Provided both customer and employee support of developed in-house products and servers
- Performed assistant UNIX network admin duties for SGI IRIX webservers and SGI desktops
- Provided Perl code maintenance and assistance as needed

Tyler's Catering Companies
2011-12 - 2012-03

POSITION: IT SUPPORT

providing tactical solutions and designing logical data models accordingly. Worked with clients to generate use case scenarios based on user requirements.
- Verified if the data model helps in retrieving the required data by creating data access paths in the data model.
-

AGILE, SCRUM, SAFE Developer

- Bring ideas from professional facilitation, coaching, conflict management, mediation, theater and so on to help the team become a high-performance team
- Empower the team to make system and process improvements captured in sprint retrospective meetings
- Remove obstacles for developers and testers
- Use key Scrum metrics (burndown, velocity) to help deliver committed work
- Manage sprint backlog items and tasks
- Manage all Scrum boards (physical or virtual)
- Leads the teams efforts towards continuous improvement
- Creates and manages project/program resource loading and budget; reconciles budget monthly and communicates risks to Leadership
- Sets and runs effective recurring status meetings with the product, portfolio and delivery managers
- Provides a single point of contact for projects
- Manages the health of the team
- Works with Product Owner to define project scope and objectives
- Works effectively with others to remove delivery team roadblocks
- Guides team through continual improvement process
-

knowledge of SAFe with an intrinsic motivation to improve the company's software and systems development processes. They play a critical role in successfully implementing SAFe. SPCs come from numerous internal or external roles, including business and technology leaders, portfolio/program/project managers, process leads, architects, analysts, and consultants.

Network design, configuration, documentation, installation and maintenance. Monitoring the performance of the billing and operations system. Anti-spam and virus protection, and e-mail authentication administration. Software upgrades and maintenance including operating system patches. Customer support on call rotation providing post sales. Data back-up, recovery and restoration.

AWS DATA ANALYTICS AND SERVICES

AMAZON DATA ANALYTICS Solutions Architect

Worked as an AWS Junior offshore Solution Architect in team where I was expected to build and maintain infrastructure that could store, process & manage the huge amount of data collected from various sources. Netflix as we know deals with both streaming and stationary data it was important to consider scalability requirements. I well versed with end to End cloud solutions (AWS) and end to end big data Solution with Hortonworks, Cloudera , including batch solutions like aws glue skis AWS pipelineI have hands on experience in AWS, AWS, IoT concepts like lambda, kINESIS firehose, Redshift, AWS Java Sdk programming and CLI tools continuous integration an continuous DEPLOYMENT , AIM, AWS Analytics, Green grass machine Learning , The netflix project on cloud formation , EMR , CHEF was all AWS orchestrated cloud watch on AWS platform as a service (PaaS) and infrastructure as a service

Real Time solutions were done on AWS kinesis functional solutions with AWS Lambda

- Collaborated with various team & management to understand the requirement & design the complete system
- Experience in guiding the classification, plan, implementation, growth, adoption and compliance to enterprise architecture strategies, processes and standards
- Designed and developed highly scalable and available systems
- Worked with services like EC2, Lambda, SES, SNS, VPC,CloudFront, CloudFormation etc,
- Demonstrated expertise in creating architecture blueprints and detailed documentation. Created bill of materials, including required Cloud Services (such as EC2, S3 etc.) and tools
- Involved in the end to end deployment process

COMPETENCE AND SKILLS

- Ability to understand **Migration requirements** and bridge the gaps
- Expertise in architecture blueprints and detailed documentation. Create bill of materials, including required Cloud Services (such as EC2, S3 etc.) and tools
- Hands-on experience with EC2, ECS, ELB, EBS, S3, VPC, IAM, SQS, RDS, Lambda, Cloud Watch, Storage Gateway, Cloud formation, Elastic Beanstalk and Autoscaling
- Demonstrable experience with developer tools like Code Deploy, CodeBuild, Code Pipeline, design the overall Virtual Private Cloud VPC environment including server instance, storage instances, subnets, high availability zones,

Interactive analytics

SAP HANA TECHNOLOGY ASSOCIATE SPS12

communicate the business need, urgency, and vision for change.Socialize the new concepts and provide orientation and overview training. SPCs teach Leading SAFe to leaders, managers, and stakeholders,Lean-Agile practices gain momentum, SPCs can socialize and drive those portfolio practices to other areas of the company, including Lean Budgets, Lean Portfolio Management, leaner approaches to CapEx and OpEx, and Agile Contracts. I also communicate the value of Strategic Themes.knowledge of SAFe with an intrinsic motivation to improve the company's software and systems development processes. They play a critical role in successfully implementing SAFe. SPCs come from numerous internal or external roles, including business and technology leaders, portfolio/program/project managers, process leads, architects, analysts, and consultants.

ORACLE CLOUD & ANALYTICS

Integration Development

Data & big data analytics

ODI 12c, ODI 11g, ODI 10g, Informatica Power Center 9.5/9.0

Oracle Big Data Cloud Service (BDCS), Oracle R Advanced Analytics for Hadoop (ORAAH), Big Data Discovery (BDD), Oracle Big Data Spatial and Graph (BDSG), Oracle Advanced Analytics (OAA), Oracle Big DataSQL, Oracle Data Visualization (DV), and Oracle Big Data Cloud Service -Compute Edition (BDCS-CE)

Modern SAAS Application Technology Professional ERP, CRM and CX solutions

 Analytics Professional – Big Data – Predictive/Prescriptive/AI/Emotional Analyst

Security Management - Security Specialist Encryption and authentication expertise, as well as the ability to write modern algorithms to control device security and application security, will be in huge demand

JAVA (5 YEARS)

JAVA 2EE

SQL

Well verse with SAP HANA Administration, Performance Optimization, Modeling using Different types of views, SQL, SQL Script topics
• SAP HANA Data provisioning using SAP Landscape Transformation and SAP Data services, DXC, Flat File Uploader, SAP HANA Architecture.
• Worked on BO 4.0 like Information Design Tool, Interactive Analysis Desktop and Launch Pad.
• Expert in data modelling and provision & Well verse with semantic layer
• Expertise in SAP BW (Business Warehousing, BW Administration, BW Extractors, ODS, InfoCubes, InfoSources, InfoObjects,and BEx Reporting), SAP Applications Integration with non SAP systems.
• Expertise in Back end Business Warehouse Components Extractors (LO Cockpit, Generic Extraction with in BW System, LIS and non R/3 extraction), Performance (Aggregates, BW Stats, Partitioning), Production Support (Process Chains,info package groups) Front end Business Warehouse Components Queries, Calculated keyFigures, restricted keyFigures, Structures, Variables, RRI (Report to Report Interface), BEx Analyzer, BEx browser.
• BW configuration, ETL background and InfoCubes design, Performance and tuning, strong on End to End BW Configurations and Customizations from Extraction, Staging, Loading, Transport, and Reporting through BEx Analyzer, and Performance.
• Extensively worked in Business Information Warehouse Info cube, ODS Objects, Infosources, Info objects, Transfer rules, update rules, Extractors, Infosources, Info packages, Info objects Catalogs, Data sources, Data Extraction, Characteristics and Key figures, Business Content, Data Marts, Process Chains Technical

Involved in information gather phase
• Migrated MS SQL Database into SAP HANA
• Created Users, Roles, Privileges, Packages, Schemas as part of HANA Security and Development
• Designed and implemented SAP HANA data modeling using Attribute View, Analytic View, and Calculation View.
• Developed complex SQL scripts in Calculation views
• Executed Data Extraction Transfer Loading (ETL) using SAP Data Services 4.0 to import csv files into SAP HANA tables to
reflect exchange live rates application
• Involved in SAP HANA Security including User Management, Roles, and Privileges
• Reporting, Accessing Analytical and Calculation views from EXCEL.
• Involved in Information Design Tool Creation of Data Foundation, Universe for HANA reporting.
• Developed Web Services for SAP HANA database and deliver to ASP.NET developers to consume data in .net based applications

COMPETENCE AND SKILLS

• SAP HANA SP04, SAP BI 7.0, SAP BO 4.0, SAP BODS
• Software Products : SAP HANA Studio, SAP HANA Information Composer
  Admin Tools : SLT, SAP Data Services, Direct Extractor Connection, Flat file Uploader
  Data Provision: Excel, SAP BO Analysis for Office, SAP BO office, SAP BO Analysis for OLAP, Business
  Reporting Object Explore, Information Design tool : HANA SQL scripting, Javascript
  Language Tools : SAP HANA Database, SQL
