- Please check that under the key role the dot is losing the shape. Use `` and give it a style.

The screenshot shows a web application interface for 'vico.net' (virtual collaboration network). The top navigation bar includes 'WEBINARS', 'INSIGHTS', 'TALENT PROFILE', 'PRICING', and a user profile icon. Below the navigation bar, there is a card for 'Hlongwane Innocent', a Web Frontend Developer from South Africa. To the right, there is a 'Number Candidates' section with a value of '1' and an 'INVITE CANDIDATES' button. Two annotations are present: one pointing to the 'Hlongwane Innocent' card with the text 'Not according to the figma interface please check it', and another pointing to the 'Number Candidates' section with the text 'Please use border-radius of 0px on top'.

Research problems

Research forms a big part of what we do: we approach problems against the grain and with the intent of extracting novel, unbiased insights from data. Various business units within Allan Gray approach us with a problem and we have realised that a sound approach is to reframe the problem into a research question using the scientific methodology. The first, and arguably, most valuable step is to formulate a hypothesis for the problem. This allows both the data science team and business team to place a yardstick, which acts as a reference point to measure the success or failure of a problem. Doing more research also exposes the team to valuable domain knowledge that could potentially turn into a long-term project in the future.

Executive Key Takeaways

What does this mean for your decision-making?

- As highlighted above the data scientist teams are well rounded in the sense that understanding the teams' capability allows maximum value creation for your business.
- How they allow room to do so is by understanding the reason as to their sense of identity- through that being able to conduct research for your business which essentially contributes to development of your business as a whole by e.g giving accurate insights or processes in accordance to your business
- Allowing for clear creation of expectations meaning allowing you to be delivery focused on how to maximize performance.
- Through research problems being an important part as to accurately addressing the problems faced by the business this In an essence ensures effective delivery as efficiently as possible.

We still have a lot to learn as a team, but that is part of the fun!
